

SlowTunes

Play *your* music at *your* pace. SlowTunes is a simple music player that lets you slow down your favorite songs without changing the pitch. You can...

- Add songs from your music library.
- Play songs at three simple speeds: normal, slower and slowest.
- Configure just how slow you want each speed.
- Stream songs to your AppleTV over AirPlay.
- Play SlowTunes in the background while you do other things.

Story

I made SlowTunes for my beautiful daughter who has [Childhood Apraxia of Speech](#). She loves music, but she has a hard time keeping up with some of her favorite songs. Now she can sing along at her own pace without making the songs all chipmunky.

It turns out SlowTunes works great for anybody, whether you're a kid with a speech delay or an adult who just wants to learn a new song. Customers have said that SlowTunes is great for

- Children with speech delays
- People listening to music a second language
- Musicians learning to play a song
- Anybody trying to learn the lyrics of a new song

Quotes

- "This is genius! I love it. It's like having my own music therapist."
- "This app is great for anyone who loves music & loves to sing along!"
- "We have been trying to slow down songs for our daughter for years... Watch out Wicked soundtrack."
